

TREMBLEX®

VIBRATION SERIES

MODEL NO. 2011

FEATURES KEYS & BENEFITS

Hexagonal Memory Gel®: Adds vibration absorption from tools and equipment, while reducing harmful effects of vibrations that cause Hand-Arm Vibration Syndrome (HAVS) and Carpal Tunnel.

Silicone Palm Grip Surface: Creates strong grip control on palm, and adds dexterity.

Form-Fitting Material: Adds breathability and helps ensure your hand is comfortable.

Terry Cloth Back on Thumb: Absorbs sweat from brow or hand, and adds breathability.

Padded Knuckles: Adds abrasion and minor impact resistance for knuckles.

Adjustable Wrist Strap: Ensures a snug fit while glove is in use.

Working with impact and power tools takes a toll on your hands, as vibrations from tools can cause hand fatigue and, over time, injury. The TrembleX features Cestus-specific vibration absorption technology that prevents vibrations from coming into contact with the hand to prevent fatigue or injury.

The TrembleX has a one-piece palm with Cestus-specific Hexagonal Memory Gel® pods in high-impact areas that absorb vibrations fully. The Hexagonal Memory Gel® also extends around the forefinger, saddle, and thumb for vibration absorption in areas that come in contact with tools when being held. Silicone grip has been added on top of the anti-vibration pods, as well as between each pod, for added gripping power.

- HEAVY CONSTRUCTION • DEMOLITION • JACKHAMMER PILOTS
- RIVETING • IMPACT & POWER TOOL USERS • PIT CREW
- CHAINSAW OPERATORS • MINING • CYCLING • MOTORIST
