

DEEP GRIP™

WINTER TEMP SERIES

MODEL NO. 5056

FEATURES KEYS & BENEFITS

MicroSable Interior Lining: Adds insulation and resists pilling for added comfort and longevity.

Flexible TPR: Protects fingers, thumb, back of hand and knuckles from cuts and scrapes, while providing time to pull hand out of glove if caught in machinery.

Long-Cuff Design: Adds protection, comfort and “tear-away” ability if caught in heavy machinery.

One-piece Palm with Kevlar® Thread Stitching: Adds durability and longevity.

SkidX® Grip: Adds oil, water, and petro-chemical resistance, as well as heightened gripping power for wet, oily or dry surfaces.

Hazards on oil and gas production sites that operate in cold weather are increased as the temperature dips, leading to the need for protective gloves with excellent grip and insulation.

Deep Grip® Winter gloves have a Skid-X grip, one-piece palm that is double stitched onto synthetic leather with Kevlar thread for added durability. The durable, yet comfortable, MicroSable interior lining insulates the glove, while a waterproof membrane ensures hands stay dry and warm. Flexible Thermoplastic Rubber (TPR) adds impact protection that bends with fingers, and offers continuous protection from finger tips to wrist.

- OIL & GAS REFINING • EXTRACTION • FRACKING • MINING
- BARREL & DRUM HANDLER • BAT CHAIN PULLER
- SEARCH & RESCUE • HEAVY CONSTRUCTION • DEMOLITION
