

Glove Sizing Chart

It is important to properly measure your hand so that gloves fit correctly, as the proper size will provide the best protection and performance.

To find the correct glove size, we recommend the following method. For reference, your dominant hand would be your right if you are right-handed and left if you are left-handed.

Measuring Directions:

- 1. Wrap a soft cloth measuring tape entirely around your dominant hand, just below the knuckles.
- 2. If you don't have a soft cloth measuring tape you can wrap a piece of string around your hand using the same method and measure the length of the string using a ruler.
- 3. Take the full circumference measurement and compare it to the chart for the recommended glove size.

NUMERICAL SIZE	LETTERED SIZE	INCHES
5	XXS	5
6	XS	6
7	S	7
8	M	8
9	L	9
10	XL	10
11	2XL	11
12	3XL	12

This example shows a circumference measurement of 9 inches. The recommended glove size would be large(9).
